For the Matinee Coat, under Shape neck some instructions have been added that should be omitted, these are after you divide for right front and shape neck and should be completely ignored.

(ignore all the remaining instructions, starting with the line; With right side of work facing, rejoin to rem 27(...etc, these instructions are incorrect and should be ignored until it gives the stitch count below;)

---

### **BHKC Pattern 48 (Baby)**

The shawl is approximately a square shape so is about 90cm, but then this has a edging which makes it approximately 95cm-100cm depending on where you measure it on the edging.

The following abbreviations are missing from the Abbreviations and should be included in the pattern;

yrn- yarn round needle

kyf- take yarn back between needles as if to knit next stitch, then take yarn over needle.

The abbreviations TWL and TWR are not used and should be omitted from the Abbreviations.

---

### **UKHKA Pattern 55**

Sleeves 3rd size of the above pattern work as follows:

1st row: k2, then in order to cast off 2sts k another 2 and pass the 3rd stitch over the 4th then knit another stitch to pass the 4th over the 5th.

This uses 5sts to work the instruction k2, cast off 2.

With 87sts on your needle divided by 5 = 17 times with the k2 remaining.

Therefore 17 times you have lost 2sts = 34sts

87sts - 34sts = 53sts

The main sequence of the row will be a gap of 2 cast off stitches with 3sts in-between.

---

### **UKHKA Pattern 58**

### UKHKA 80

NB: More stitches are required on this pattern than a normal D.K. stocking stitch pattern, because it's a cable stitch pattern and therefore takes a lot more stitches to tension. The pattern will work to tension as stated in the pattern 36 sts to 30 rows over a 'Cable pattern'. This means more stitches need to be cast on to meet standard measurements.

Sweater Front and Back of Cardigan  
(3rd row down)

'work as Sweater Back from \*\*\* to \*\*\* ' then 'continue straight in st.st until work measures'  
*should read:* 'work as Sweater Back from \*\*\* to \*\*\* ' then continue in pattern until work measures...

## Sleeves

Mathematically the Sleeve tops are correct. The Sleeve tops aren't worked row for row to the armholes they are meant to be eased in to avoid gathering. If the shapings are worked too tightly ie cast off rows worked tightly this will prevent this.
